Betsie Lake Utilities Authority :
Septage and Holding Tank Receiving Plan:

Location of Facility: Betsie Lake Utilities Authority
181 Lake Street , Frankfort, Mi.

Operating Hours : 7:00 A.M. to 5:00 P.M. Monday through Friday
Weekends on limited hours as needed to service hauler's.

Type of Material accepted at Facility: Septage and Holding tank waste.
Septage and Holding tank waste from domestic homes, waste from
portable toilets and similar treatment works or storage devices.

Fee rate: Fee for disposal is set by the Authority at per gallon charge for
metered gallons received at station. The Authority will review this rate as more
information on the amount and costs of operation are collected by the Authority.
The rate charged will be reviewed on at least a yearly basis.

Service Area: Limit is 15 Road Miles from the Wastewater Treatment Plant at 181
Lake Street, Frankfort Mi. , to extend to 15 Mi. Radius on October 12, 2005.

Rules for Hauler's using the Receiving Station.

The Betsie Lake Utilities Authority will require that all Hauler's register with the
Authority office and receive a identification card to operate the equipment at the
receiving station.

All registered Hauler's shall submit to random sample testing of their loads as requested
by the Authority, any problems detected by sampling may result in the Hauler losing his
ability to dispose of Septage and holding tank waste at the Facility.

Any registered Hauler that is found disposing of any substance other than Septage or
Holding tank waste shall lose his right to use the receiving Facility.

Any operating problems with the receiving station shall be reported to the Authority
Office at the time of the problem if possible, or as there is someone available to notify.
There will be list of possible contacts on the front of the receiving station.
In the event of a spill at the receiving station the Hauler shall remain at the station until

the Authority has been notified and possible cleanup is completed. Failure to comply with result in the Hauler losing his right to dispose of Septage and holding tank waste at the Facility.

Plant loading.

The Authority reserves the right to limit the amount of gallons that are delivered to the receiving station for treatment and disposal by the Authority. The receiving of Septage and Holding Tank waste shall be governed by the Authority as to ability of the plant to treat and dispose of the Biosolids generated by the receiving of Septage and Holding Tank waste. Current loading of the plant is 60 % of rated capacity, the remaining 40 % of the rated capacity can be used to treat Septage and holding tank waste. The loading from the Septage and holding waste will be monitored by the Authority and regulated according to the rated capacity of the plant to treat such waste and to obtain the best possible treatment of the waste received .
